

BRETT'S GRASS SEED MIXTURES 2021

BRETT'S GRASS SEED VARIETIES

TETRAPLOID VARIETIES

AberGain: This popular variety is well-known for its unbeatable quality and consistent yield. A top performer on the PPI list, this variety helps to create a palatable mixture for increased intake and improved animal performance.

AberClyde: The highest PPI value on the recommended list. Outstanding seasonal growth and total yield with excellent dry matter digestibility. This persistent variety is the ultimate allrounder.

GraceHill: The highest PPI value on the recommended list for the late tetraploids, excellent growth throughout the season resulting in improved grass production.

DIPLOID VARIETIES

AberChoice: Unbeatable quality and palatability with consistent yield. This high performing late diploid variety is persistent with good ground cover.

Ballyvoy: High yielding throughout the growing season, with excellent quality and digestibility for improved intake and animal performance.

Drumbo: A consistent variety with good performance in quality, summer and autumn growth and ground cover.

Gold Sward Extend

Specially formulated to meet the needs of the intensive grassland farmer. This mixture has equal inclusion of tetraploids and diploids and will form a high quality, dense sward with excellent spring and autumn growth. The sward has exceptional palatability which leads to improved animal intake and performance. The mix is based on the highest performing varieties on the PPI list.

GOLD SWARD EXTEND
