

BRETT'S GRASS SEED MIXTURES 2026

BRETT'S GRASS SEED VARIETIES

TETRAPLOID VARIETIES

Banbridge: This is its first year on the recommended list and is a top performer. Its Spring and silage growth combined is unmatched and will be a powerful addition to new swards this year.

AberGain: This popular variety is well-known for its unbeatable quality, consistent yield and ground cover. It performs well in spring and Autumn growth and is a long-standing top performer on the PPI list.

Glenfield: Consistent growth throughout the season and the highest late tetraploid for grazing utilisation. This variety is both palatable and high yielding. A exceptional all-rounder.

GraceHill: Excellent growth throughout all seasons resulting in improved total yield and consistent silage yield with high grazing utilisation.

DIPLOID VARIETIES

AberChoice: This is a very persistent variety with good ground cover. It is a proven top performing late diploid on the PPI list with excellent quality, total yield, and digestibility.

Ballyvoy: This variety is high yielding throughout the growing season and is strong on spring growth resulting in high quality and digestibility for improved animal performance.

AstonConqueror: A powerful intermediate Diploid, with strong spring growth and scores well for silage yield and ground cover.

Gold Sward Extend

Gold Sward Extend is formulated to meet the needs of an intensive grassland farmer. This mixture has an equal inclusion of tetraploids and diploids and will form a high quality, dense sward with excellent spring and autumn growth. The mixture is based on the highest performing varieties on the PPI list, for growth and performance. Gold sward extend contains white clover at the correct rate for derogation farms.

Gold Sward

Designed as a high-quality cut and graze mixture with a balanced growth pattern across the season. The varieties have been specifically chosen to produce a highly palatable sward, to aid animal intake and improve overall herd / flock performance. Gold sward contains Clodagh and Dungloe clover seed at a suitable rate for derogation farms.

Clover Pack

We have a specific coated white clover pack available which can be over-sown in newly established swards or permanent pasture. This 5kg pack will cover 1 ha and includes varieties that are well suited for grazing swards.

GOLD SWARD EXTEND			
Inclusion Rate	Variety	Type	Heading Date
2.7 kg	AberGain	Late Tetraploid	4th June
3.0 kg	GraceHill	Late Tetraploid	4th June
3.7 kg	AberChoice	Late Diploid	11th June
2.0 kg	Ballyvoy	Late Diploid	3rd June
0.6 kg	Aberswan Clover	Medium Leaf	
12.0 kg			

GOLD SWARD			
Inclusion Rate	Variety	Type	Heading Date
3.2 kg	Banbridge	Intermediate Tetraploid	26th May
3.2 kg	Glenfield	Late Tetraploid	3rd June
5.0 kg	AstonConqueror	Intermediate Diploid	27th May
0.3 kg	Dungloe	Medium Leaf Clover	
0.3 kg	Clodagh	Large Leaf Clover	
12.0 kg
